

Innoforms

Your Safety And Compliance
Check Partner

**Looking for a simple solution to manage your
company's safety and compliance issue?**

Innoforms is an intuitive tool to simplify your safety
and compliance worries. A simple manual error can
cost you a hefty fine, so start regulating your business
process with our innovative mobile forms.

Innoforms

Benefits

Innoforms can be configured into your system with a simple download. Once your admin configures all the required forms, its simple for permitted users to directly access the form, fill it and submit it for review. The forms can also be instantly updated as soon as its submitted to reduce the overall operational time. You also drastically reduce the man hours required to re-enter information from the paper form to the computer.

How Innoform Helps Compliance Maintenance

Your business process includes various checklists and regulations, keep everything in check with proper documentation.

- Pre-defined with all the necessary fields to fit right into your core business process.
- Forms can be easily filled and saved to the system with minimum effort. Each entry is regulated to ensure the proper information is captured.
- Regulations changes often, by changing the form field in the main digital form, you reflect the desired change across the entire organization. This ensures you always maintain the correct fields for ISO and other standards.
- Customise each form to fit your organisational needs
- Set workflow to maintain the decorum of the organization
- Give permissions to users to maintain the hierarchy of your institution for improved security compared to paper forms.

Maintain A Safe And Secured Workforce

One of the biggest challenges is getting the required information across at the right time. With a large work field and workforce, it's difficult to call for instant help to avoid unnecessary downtime in operations.

- Set instant alert systems to call for immediate help in case of accidents or machinery failure
- Have a set of rules ready to access instantly to get operations back on track
- Maintain a transparent system by letting external stakeholders access information when needed to remove bureaucratic indifferences

Innoforms

Features

Paper-based compliance systems are inaccurate and inefficient as they hold a huge communication gap. Innoforms lets you remove the adversaries with simple digitised forms. It drastically improves your business process by reducing liabilities and instilling a sense of security. The workforce is directly responsible for each and every action which makes them more cautious, efficient and accountable to all of their actions.
